# soabar

Labels, Swing Tickets and Barcode Printers

8t Series

The 8 series printer is available as 300dpi or 400dpi as standard and when coupled with the corner edge technology the clarity of the print is very high.

With the 8 series printer in your company, you can single card tickets on demand to apply direct to your products rather than applying a secondary label to your tickets saving time and money within the business whilst making the product more professional.

Printing barcodes, batch codes, sequential numbers, dates and other variable information to your label gives you traceability and flexibility.

With onsite installation and training you can be sure your staff will be able to operate the printer easily.
